5. Please amend FINAL claim 1 as filed on April 6, 2009 in the following manner: 6/29/09

9. A method of [[using]] a processor ~~to determine~~ determining consumption of medication dispensed pursuant to a prescription for medication at one or more pharmacies, the method comprising the steps of:

a) the processor obtaining ~~using the processor~~ over a communication network a plurality of electronic medication dispensation transaction records from the one or more pharmacies in response to a request for the transaction records;

b) the processor correlating ~~using the processor~~ the obtained medication dispensation transaction records to the prescription;

c) the processor extracting ~~using the processor~~ medication dispensing data and medication usage data from the correlated medication dispensation transaction records, wherein the medication usage data includes an amount of medication in the prescription that has been returned or not consumed;

d) the processor consolidating ~~using the processor~~ medication dispensing data and medication usage data related to the same prescription dispensed at all of the one or more pharmacies;

e) the processor identifying ~~using the processor~~ at least one pattern in the medication dispensing data and medication usage data;

f) ~~utilizing the pattern using the processor to formulate at least one logical rule~~ the
